---

WORK EXPERIENCE

Salesforce (Admin Module) | Sampurv Technologies   **June 2023 – July 2023**

- Completed my Internship in salesforce admin module.
- Worked on Salesforce CRM to develop and customize applications using Salesforce Admin and declarative tools.
- Created and managed objects, fields, workflows, and approval processes to meet business requirements.
- Configured user roles, profiles, permission sets, and sharing rules to ensure proper data security and access controls.

PROJECTS

Automatic Fire Extinguisher for EV's

- Developed a fire suppression system for electric vehicles using IoT technology to ensure real-time monitoring and rapid response.
- Integrated sensors to detect temperature anomalies and trigger automatic extinguishing mechanisms.
- Conducted testing to validate system reliability and performance in diverse conditions.
- Ensures enhanced passenger safety and minimizes fire-related risks in electric vehicles.

Portfolio Website

- Developed a personal portfolio website to showcase my projects, skills, and achievements.
- Built using **HTML, CSS, JavaScript**, and enhanced with **React.js** for dynamic content.
- Features sections on **projects, certifications, skills, and contact information** for professional networking.
- Implemented **responsive design** for accessibility across different devices.
- Includes an **interactive resume download** and links to GitHub and LinkedIn.

Alumni Portal Ramdeobaba College

- Developed an alumni portal to connect past and present students of Ramdeobaba College.
- Built using HTML, CSS, JavaScript and Firebase Database Google for dynamic content management.
- Features user authentication, alumni profiles, event announcements, and job postings.
- Enables alumni to share experiences, mentor students, and network professionally.
- Implemented a search and filter system to easily find and connect with alumni.
